AppServ-win32.2.5.10

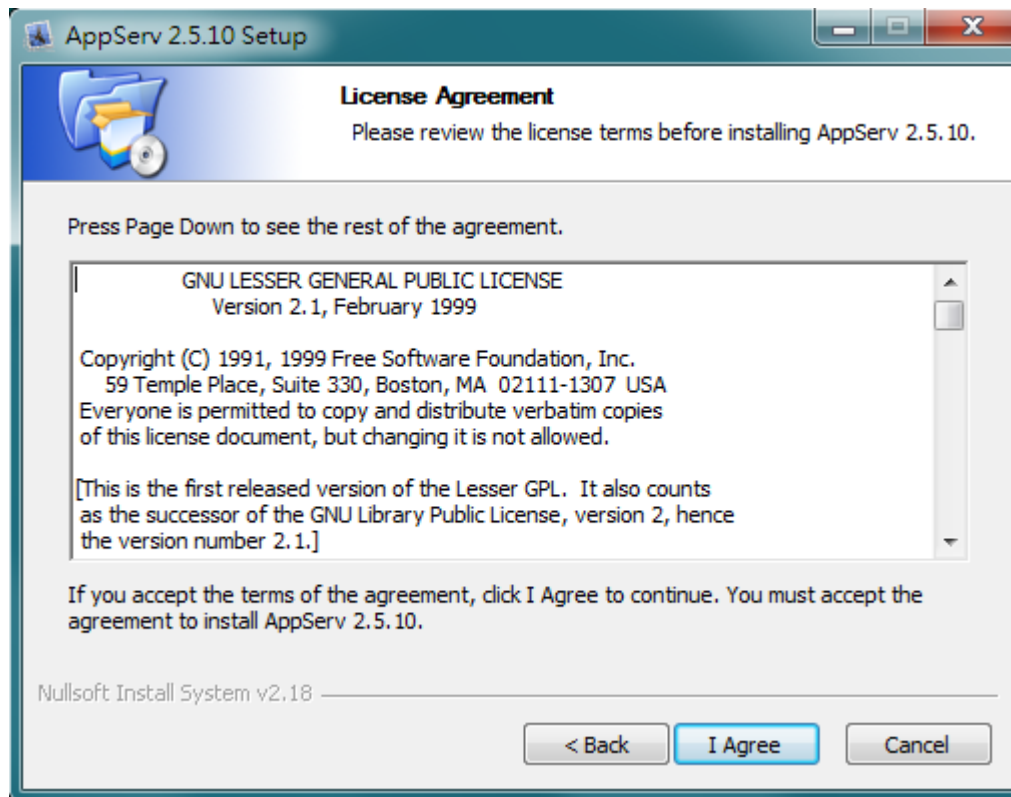

Installation Step

1. Double click appserv-win32-2.5.10.exe to install, then click [Next] to go to next step.

AppServ-win32.2.5.10 Installation Step

2. License Agreement, click [I Agree] to go to next step.

AppServ-win32.2.5.10 Installation Step

3. Choose install location, and then click [Next] to go to next step.

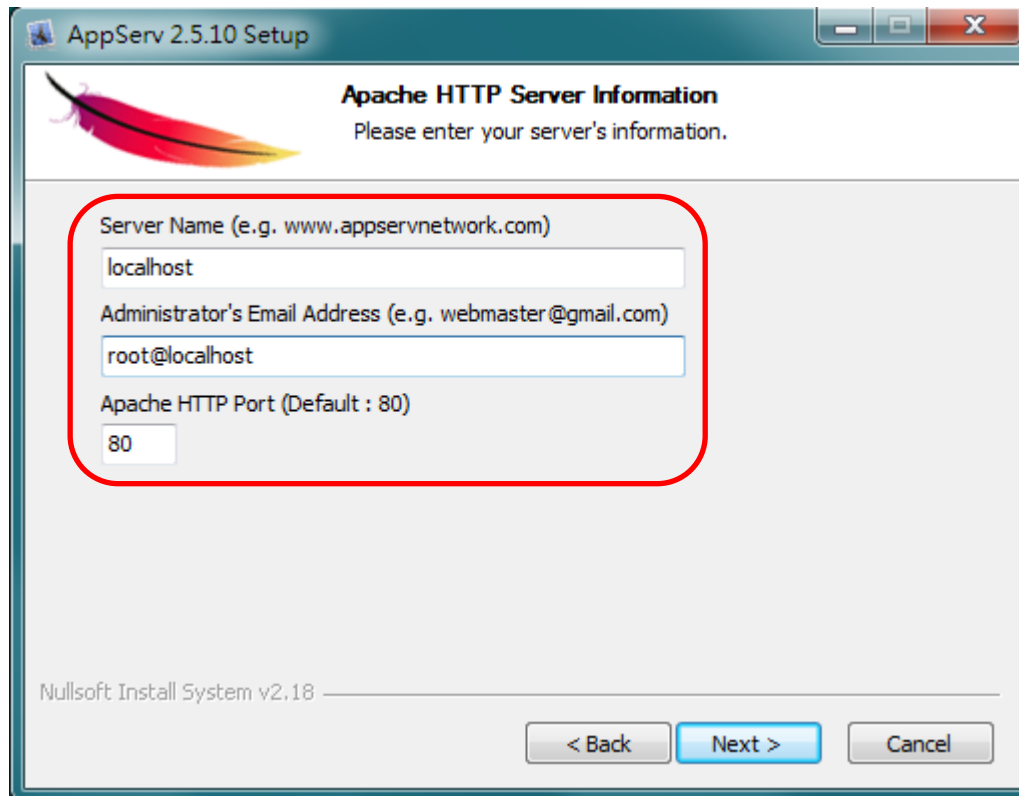

AppServ-win32.2.5.10 Installation Step

4. Select all appserv package components it's, and then click [Next] to go to next step.

AppServ-win32.2.5.10 Installation Step

5. Please specify Apache Configure, and then click [Next] to go to next step.

The image shows a Windows installation window titled "AppServ 2.5.10 Setup". The window has a standard Windows XP-style title bar with minimize, maximize, and close buttons. Inside the window, there is a logo of a colorful feather on the left and the text "Apache HTTP Server Information" followed by "Please enter your server's information." on the right. Below this, there are three input fields: "Server Name (e.g. www.appservnetwork.com)" with the value "localhost", "Administrator's Email Address (e.g. webmaster@gmail.com)" with the value "root@localhost", and "Apache HTTP Port (Default : 80)" with the value "80". A red rounded rectangle highlights these three input fields. At the bottom of the window, there is a status bar that says "Nullsoft Install System v2.18" and three buttons: "< Back", "Next >" (which is highlighted in blue), and "Cancel".

◆ Downloads Address:

www.adobe.com/support/flashmediaserver/downloads_updaters.html

A screenshot of a web browser displaying the Adobe Flash Media Server download page. The browser's address bar shows the URL 'www.adobe.com/support/flashmediaserver/downloads_updaters.html'. The page content is organized into sections for different versions of the software. At the top, there are two download links for the Windows Update (64-bit) and Linux Update (64-bit), both in EXE format. Below this, the 'Flash Media Server 4.5.2' section is highlighted with a red rounded rectangle. It includes a release date of April 4, 2012, and provides download links for Windows and Linux updates. The 'Flash Media Server 4.5.1' section follows, with a release date of December 14, 2011, and similar download links. The 'Flash Media Server 4.0.3' section is also highlighted with a red rounded rectangle, showing a release date of August 9, 2011, and download links for both 32-bit and 64-bit Windows and Linux updates. Finally, the 'Flash Media Server 3.5.7' section is shown at the bottom, with a release date of August 9, 2011, and download links for Windows and Linux updates.
